Internet at the table is needed for the set

A component of this set runs remotely from a server in Milan. Please provide internet access via **Wi-Fi or an Ethernet cable**. If that is not possible, please confirm in advance that there is **good 4G/5G reception on stage** so a hotspot can be set up.

CHANNEL LIST

#	Source	Mic / DI	Comments
1	Amp mic	AKG D112 or equivalent bass drum mic	Amp receives input from the interface, FOH takes the mic
2	Sub frequencies	DI mono	Input from the interface, sub frequencies only
3	Interface L	DI mono / DI stereo L	Main mix (without sub frequencies channel)
4	Interface R	DI mono / DI stereo R	Main mix (without sub frequencies channel)

BROUGHT BY EYAL

- MacBook with Ableton Live
- Audio interface (4 in / 4 out)
- Korg Volca Modular
- iPad (VNC remote for Osirus)
- Korg nanoKONTROL + Korg nanoKEY
- USB hub, jack cables, power adapters, power splitter

MONITORS

Monitor L + R should receive channels 2, 3 and 4, all around the same level. Not needed when performing in front of the PA.

SET-UP & BALANCE

Unloading + set-up	10 minutes
Soundcheck	20 minutes
Set time	25–60 minutes (improvised, average 40)

HOSPITALITY

Catering: a full hot meal, preferably vegan or vegetarian. No red lentils. **No chicken**, nothing cooked alongside chicken (allergy).
Drinks: hot herbal tea (mint, camomile or similar, caffeine-free), non-alcoholic beer, natural orange juice. No coffee or caffeinated drinks (incl. black/green tea, cola).
Accommodation: bed in a separate room for one person unless specified otherwise, **next to a power socket for a CPAP machine** (mandatory, health reasons). No bunk beds or anything requiring climbing stairs.

BACKLINE TO SUPPLY

- 3-way/4-way PA sound system + subs (**SUBS ARE MANDATORY**)
- Mixing desk (min. 12 ch + 2 aux) + sound technician
- Table for Eyal's equipment (min. 1 m × 1 m) + black cloth
- 2× stage monitors · 1× bass amp
- 1× AKG D112 or equivalent + 1× mic stand
- 3× DI mono, or 1× stereo DI + 1× DI mono
- 3× jack (PL) cables for Eyal's interface
- 4× XLR cables (1 for mic, 3 for DI)
- 1× power socket (230 V) at the table
- **Internet at the table: Wi-Fi or Ethernet** (see above)

LIGHTING

Red/blue spot above Eyal, room as dark as possible. **DO NOT USE STROBING LIGHTS.**

ADDITIONAL NOTES

Sound typically ranges between 90–105 dBA, not less than 90 dBA. Sub frequencies are an essential part of the performance. Please let Eyal know in advance about any volume limits at the venue. Earplugs are recommended.
Please don't help carry the equipment unless asked.
Photography and recording by any means are permitted, a copy of the recording would be appreciated.
Thank you in advance and see you soon :)
